

DIODE MODULE

DD200KB

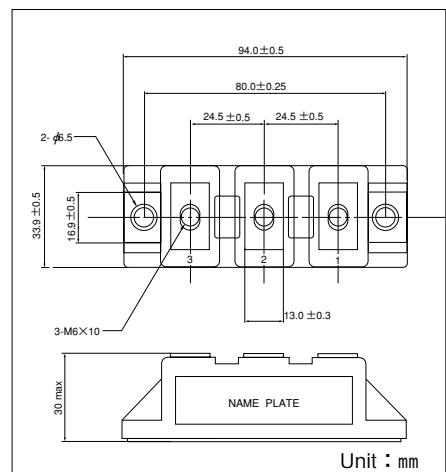

UL:E76102(M)

Power Diode Module **DD200KB** Series are designed for various rectifier circuits. **DD200KB** has two diode chips connected in series and the mounting base is electrically isolated from elements for simple heatsink construction. Wide voltage rating up to, 1600V is available for various input voltages.

- Isolated mounting base
- Two elements in a package for simple (single and three phase) bridge connections
- Highly reliable glass passivated chips
- High surge current capability

(Applications)

- Various rectifiers, Battery chargers, DC motor drives

(T_j=25°C unless otherwise specified)
