

# 3-Phase Diode Bridge

# DF20AA120/160

UL; E76102

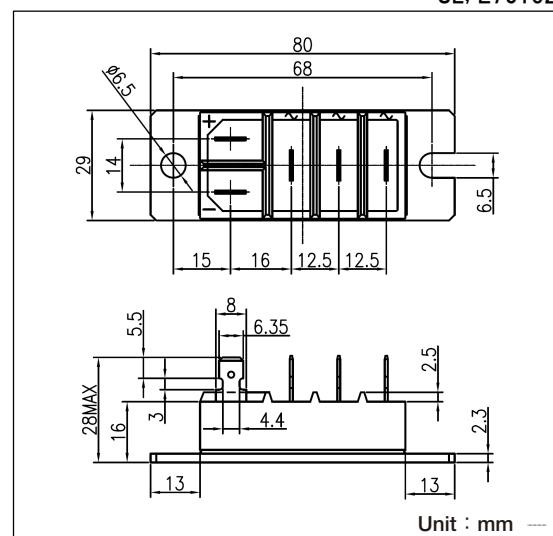

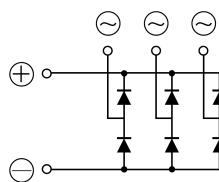

## 『Features』

Power Diode Module DF20AA is designed for three phase full wave rectification, which has six diodes connected in a three phase bridge configuration. The mounting base of the module is electrically isolated from semiconductor elements for simple heatsink construction output. DC current is 20Amp ( $T_c=119^\circ\text{C}$ ). Repetitive peak reverse voltage is up to 1,600V.

- $T_{j\text{Max}}=150^\circ\text{C}$
- Isolated Mounting Base
- High reliability by unique glass passivation
- Easy Assemble by the #250 terminal Tab

## 『Applications』

- AC. DC Motor Drive / AVR / Switching — for three phase rectification
